

## Functional Analyst/Tester

**Soort functie:** Freelancer en vaste medewerker      **Locatie:** Brussels  
**Duur:** Longterm      **Referentie:** 202209478

### Omschrijving:

Our client is looking for a new functional analyst to join the team.

A new member will be working in the agile teams performing analysis of new functionalities for the IFH application that is used for the Fiber design and roll-out.

### Vereisten:

#### Requirements:

##### Must have:

- 5+ years relevant work experience as Functional analyst and tester in a software development or system implementation environment through Application Life cycle Management process
- Excellent written and oral English language skills

##### Nice to have:

- Master's degree
- Experience defining test cases and reporting testing status to management (knowledge of JIRA XRAY is a plus)
- Strong knowledge of UML
- 5+ years' SQL scripting skills in an Oracle database environment
- Preferably experience to work in Agile
- GIS and Telecom domain experience
- FR/NL language knowledge

##### Behaviour & attitude:

- Strong analytical and problem-solving skills
- Customer-focused attitude with strong communication skills
- The project will have a duration of 2 years minimum
- Work from the office will be required 2 days per week, for now, following the general guide lines

**Start:** 2022-05-29 22:00:00
