

Project Manager - Medior

Soort functie: Freelancer en vaste medewerker **Locatie:** Liège
Duur: long term **Referentie:** 202209527

Omschrijving:

For our Customer in the telco business, we are looking for a project manager - medior level.

Role description

Responsible of End to End Operational project
Define and respect the deadline of the operation planning
Operational follow up
Responsible to manage and to steer the virtual teams throughout the different departments and external partners
Responsible to ensure that the business or technical projects are delivered on -time, on-scope and on-budget through the use of the Customers methodology while ensuring continuous alignment between the various stakeholders (within impacted teams)

Required Responsibilities

Scope management:

To ensure that the needs of the internal clients are taken into account and that the business/technical solutions are delivered in line with the agreed requirements.
To challenge requested scope changes and this during the duration of the project.

Cost management:

To define together with all involved parties the needed project budget.
To ensure you get this budget approved by all necessary "governance bodies";
To identify timely budget variances and to challenge them avoiding your projects exceeds their budget

Time Management

To define in cooperaton with your project team a clear and realistic project plan that meets project objectives and clearly identifies the expected results and the associated resources
To commitment from the different departments on the expected results
To challenge the various parties involved ensuring delivery within agreed timeframe

Risk Management:

To avoid problems by identifying pro-active risks/issues and initiating timely the appropriate actions
To escalate timely project problems to line management and /or project stakeholders ensuring they can still take appropriate action within their organisation

Reporting and Communication:

To liaise on a continuous basis with management from the impacted departments avoiding surprises by ensuring they are "at any time" fully aware of the project status.

°People Management:

To provide day-to-day management and coaching of one or more virtual teams
