

Communication Process Expert

Soort functie: Freelancer en vaste medewerker **Locatie:** Brussels
Duur: Longterm **Referentie:** 202209571

Omschrijving:

Our Customer is a Telecom & ICT company operating in Belgium and on the international markets, providing services to consumers, businesses and the public sector. Their advanced interconnected fixed and mobile networks offer access anywhere and anytime to digital services and data, as well as to a broad offering of multimedia content. They invest in future-proof networks and innovative solutions, creating the foundations for sustainable growth.

RESPONSIBILITIES:

As part of the Communication team, the mission is to help transform and digitalize the client's communications in a customer-oriented way. This will be facilitated by bridging communication business requirements with development teams, also keeping a clear business perspective in the implementation of digital communication solutions. The migration towards a new Digital Communication Platform should further enable this.

GOALS OF THE FUNCTION

- Understand the business logic of communication-related projects and requests, to optimally translate them in concrete solution designs, with focus on the new Digital Communication Platform
- Ensure the best implementation plan possible in order to respect this business logic in the communication flows
- Facilitate the bridging between business and technical teams, always keeping the business point of view and customer orientation at the center of technical developments.

EXPECTED RESULTS - RESPONSIBILITIES

Responsibility 1: Ensure an optimal follow-up of projects as well as day-to-day requests in the domain of customer communications for optimal end-to-end implementation, up to operations within the (new) Digital Communication Platform.

Responsibility 2: Translate Business requirements into digital communication solutions, knowing the potential offered by the solution architecture.

Responsibility 3: Participate to the testing and monitoring of the implemented solution, to check the final quality of delivery end-to-end.

Responsibility 4: Measure the customer experience behind the solution design, analyze impacts of operational issues, and ensure solution implementation.

Responsibility 5: Special focus point: Take a leading role, together with the communications team in the clean-up and migration of existing templates from the present to the new Digital Communication Platform, in line with the prioritized roadmap

Vereisten:
